

Coloring activity using standardized United States Geologic Survey color scheme. Extremely useful if the spatial distribution of rocks of one age are trying to be emphasized. Upon completion colored map should resemble WVGES Map MP-25A available at: <http://www.wvgs.wvnet.edu/www/maps/geomap.htm>

Note: Printers may produce slight variations in hue and shade so legend colors may not match standardized colors shown on Map 25-A. Highly generalized exploratory device.
